

ENVIRONMENTAL POLICY

We are conscious of the fact that our business goals have to be respectful of the environment and have to support a long-term environmental policy. Therefore the economical use of energy and raw materials is a component of our business policy as is the protection of water, ground and air.

We, at **TEAM THAI**, are committed to continuously improve the environmental performance by the prevention of pollution and to improving efficiency in the use of resources.

Our policy is enumerated as follows:

- We manage our business activities to meet the requirements of all applicable laws and regulations.

- We are committed to ongoing sustainable management of our environmental impacts within our facilities and operations and acting to reduce our rates of emissions, energy and waste.

- We regularly evaluate environmental, health, safety and security performance, measure improvements and define improvement objectives.
- Reduce carbon emissions and use alternative energy options where practically feasible. Our vehicles are regularly serviced and all drivers are required to do various maintenance checks on a daily/ weekly basis to ensure that vehicle engine emissions are minimised where possible.

- Minimise pollution and consumption of fuel, energy and water where possible.

- Implement environmental training and awareness programmes for our employees and encourage them to work in an environmentally responsible manner.
- All vehicles are fitted with tracking devices which monitor driving behaviour related to fuel efficiency and which reduce unnecessary mileage by selecting the most effective routing.
- Establishing a continuous process of driver training, incentives and corrective maintenance procedures to manage and reduce atmospheric pollutions.

- We carry out the duly planned preventive maintenance and to minimize the negative environmental impacts related to the operation of vehicles, machinery and equipment.
- We conduct our services and activities in a sustainable manner by protecting the health and well-being of our employees and stakeholders and reducing the negative impact of our activities on employees, customers and the public.
